# Projects : 3

Search for:

Order: ☒ Ascending ☐ Descending

☐ Projectnumber ☐ Projectname ☐ Startdate ☐ Enddate ☐ Coursecode

☐ Coursename ☐ Academic Credits ☐ Short Description ☒ Techniques ☐ Long Description

Clear

Search

C++  
eclipse  
emacs  
linux  
python

Results on other page

 2008-12-01 Our own computer language

A project where we made our own computer language with Ruby, I don't know if it's true since, well this is just a filler

 2008-10-01 Game

A game made with c++ using Object Oriented programming combined with Eclipse

 2008-08-01 Portfolio

Project made in XHTML/CSS for presenting projects made throughout education

```
search='emacs'  
search_order='asc'  
sort_by=['start_date']  
search_field=['techniques_used']
```

This should search for emacs in techniques\_used and then sort\_by ascending start date.

You can also use the techniques list to search for projects by marking (multiple with ctrl in Windows or Linux and cmd in OS X)  
The techniques list will then show projects using each technique that use one of the marked techniques and then depending on the rest of the search formula (search box or field) it will list it below the search button

Results after the search

As you can see

it's sorted after start date and

it's ascending

and three projects uses emacs.

Check the techniques page for confirmation.
